

## INDEPENDENT ASSURANCE REPORT

To the management of Entrust Corporation ("Entrust"):

### Scope

We have been engaged, in a reasonable assurance engagement, to report on Entrust management's [statement](#) that for its Certification Authority ("CA") operations in Ottawa, Ontario, Canada, Toronto, Ontario, Canada, throughout the period 1 March 2022 to 28 February 2023 (the "Period") for its CAs as enumerated in [Attachment A](#), Entrust has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its Certification Practice Statements as enumerated in [Attachment B](#)
- maintained effective controls to provide reasonable assurance that Entrust provides its services in accordance with its Certification Practice Statements
- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by Entrust); and
  - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorised individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#), including the following:

### CA Business Practices Disclosure

- Certification Practice Statement ("CPS")

### CA Business Practices Management

- Certification Practice Statement Management

### CA Environmental Controls

- Security Management
- Asset Classification and Management
- Personnel Security
- Physical and Environmental Security
- Operations Management
- System Access Management
- System Development, Maintenance, and Change Management
- Disaster Recovery, Backups, and Business Continuity Management
- Monitoring and Compliance
- Audit Logging

### CA Key Lifecycle Management Controls

- CA Key Generation
- CA Key Storage, Backup, and Recovery

- CA Public Key Distribution
- CA Key Usage
- CA Key Destruction
- CA Key Compromise
- CA Cryptographic Hardware Lifecycle Management
- CA Key Transportation
- CA Key Migration

#### **Subscriber Key Lifecycle Management Controls**

- CA-Provided Subscriber Key Generation Services
- CA-Provided Subscriber Key Storage and Recovery Services
- Requirements for Subscriber Key Management

#### **Certificate Lifecycle Management Controls**

- Subscriber Registration
- Certificate Renewal
- Certificate Rekey
- Certificate Issuance
- Certificate Distribution
- Certificate Revocation
- Certificate Validation

#### **Subordinate CA and Cross Certificate Lifecycle Management Controls**

- Subordinate CA and Cross Certificate Lifecycle Management

Entrust does not escrow and archive its CA keys, does not provide integrated circuit card management services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.

Entrust has issued cross-certificates to third-party certification authorities which were valid during the Period. The operations of these third-party certification authorities were not in scope for our engagement, and, accordingly, we express no opinion on these third-party certification authorities.

Entrust has additional Issuing CAs not in the scope of this report that chain to Root and/or Intermediate CAs within the scope of this report. These Issuing CAs do not issue TLS Web Server, Code Signing, or Time Stamping certificates. Our procedures did not extend to these Issuing CAs, and, accordingly, we express no opinion on them.

#### **Certification authority's responsibilities**

Entrust's management is responsible for its statement, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

#### **Our independence and quality control**

We have complied with the relevant rules of professional conduct / code of ethics applicable to the practice of public accounting and related to assurance engagements, issued by various professional accounting bodies, which are founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies Canadian Standard on Quality Control 1, *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance Engagements*, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

#### **Practitioner's responsibilities**

Our responsibility is to express an opinion on management's statement based on our procedures. We conducted our procedures in accordance with Canadian Standard on Assurance Engagements 3000, *Attestation Engagements Other than*

*Audits or Reviews of Historical Financial Information*, set out in the CPA Canada Handbook – Assurance. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s statement is fairly stated, and, accordingly, included:

- (1) obtaining an understanding of Entrust’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
- (2) selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
- (3) testing and evaluating the operating effectiveness of the controls; and
- (4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Relative effectiveness of controls

The relative effectiveness and significance of specific controls at Entrust and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

### Inherent limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorised access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

### Other matters

Without modifying our opinion, we noted the following other matters during our procedures:

Matter topic	Matter description
<b>1 Mozilla ‘bug’ responses</b>	As described in management’s statement, management has reported or responded to certain ‘bugs’ on Mozilla’s Bugzilla reporting system. Management’s statement contains information on their outcome or resolution.
<b>2 No occurrences of in scope events during the audit period</b>	During the examination period there were no instances or occurrences of underlying events related to the following control activities: <ul style="list-style-type: none"><li>• Section 4.7 CA Key Compromise No key compromise event occurred during the audit period. As underlying event had not occurred, related control activities did not operate during period under audit.</li><li>• Section 4.11 CA Key Migration No key migration event occurred during the audit period. As underlying event had not occurred, related control activities did not operate during period under audit.</li></ul>

### Practitioner’s opinion

In our opinion, throughout the period 1 March 2022 to 28 February 2023, Entrust management’s statement, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

This report does not include any representation as to the quality of Entrust’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.2.2, nor the suitability of any of Entrust’s services for any customer’s intended purpose.

**Use of the WebTrust seal**

Entrust's use of the WebTrust for Certification Authorities Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

A handwritten signature in black ink that reads "Deloitte LLP." The signature is written in a cursive, flowing style.

## ENTRUST MANAGEMENT'S STATEMENT

Entrust Corporation ("Entrust") operates the Certification Authority ("CA") services as enumerated in [Attachment A](#), and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate validation
- Subscriber key generation and management
- Subordinate CA cross-certification

The management of Entrust is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its [website](#), CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to Entrust's Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Entrust management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in Entrust management's opinion, in providing its CA services at Ottawa, Ontario, and Toronto, Ontario, throughout the period 1 March 2022 to 28 February 2023, Entrust has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environment control practices in its Certification Practice Statements as enumerated in [Attachment B](#)
- maintained effective controls to provide reasonable assurance that Entrust provides its services in accordance with its Certification Practice Statements
- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by Entrust); and
  - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#), including the following:

### CA Business Practices Disclosure

- Certification Practice Statement ("CPS")

### CA Business Practices Management

- Certification Practice Statement Management

#### **CA Environmental Controls**

- Security Management
- Asset Classification and Management
- Personnel Security
- Physical and Environmental Security
- Operations Management
- System Access Management
- System Development, Maintenance, and Change Management
- Disaster Recovery, Backups, and Business Continuity Management
- Monitoring and Compliance
- Audit Logging

#### **CA Key Lifecycle Management Controls**

- CA Key Generation
- CA Key Storage, Backup, and Recovery
- CA Public Key Distribution
- CA Key Usage
- CA Key Destruction
- CA Key Compromise
- CA Cryptographic Hardware Lifecycle Management
- CA Key Transportation
- CA Key Migration

#### **Subscriber Key Lifecycle Management Controls**

- CA-Provided Subscriber Key Generation Services
- CA-Provided Subscriber Key Storage and Recovery Services
- Requirements for Subscriber Key Management

#### **Certificate Lifecycle Management Controls**

- Subscriber Registration
- Certificate Renewal
- Certificate Rekey
- Certificate Issuance
- Certificate Distribution
- Certificate Revocation
- Certificate Validation

#### **Subordinate CA and Cross Certificate Lifecycle Management Controls**

- Subordinate CA and Cross Certificate Lifecycle Management

Entrust does not escrow and archive its CA keys, does not provide integrated circuit card management services, and does not provide certificate suspension services. Accordingly, our statement does not extend to controls that would address those criteria.

Entrust management has also reported to the following 'bugs' on Mozilla's Bugzilla reporting system:

Bug ID	Summary	Opened	Closed
1737057	CRLs and OCSP responses not issued as specified in the CPS	21-Oct-2021	8-Mar-2022
1748634	Late Revocation for SSL Certificates issued with Un-verified IP Addresses	5-Jan-2022	8-Mar-2022
1766525	TLS Certificate issued with a key that is impacted by the Close Primes vulnerability	26-Apr-2022	30-Aug-2022
1792231	TLS Certificate issued with an incorrect state or province	23-Sep-2022	19-Apr-2023
1802916	EV TLS Certificate incorrect jurisdiction	28-Nov-2022	24-Apr-2023
1804753	Delayed Revocation for EV TLS Certificate incorrect jurisdiction	8-Dec-2022	19-Apr-2023

A handwritten signature in black ink that reads "Bruce Morton".

## INDEPENDENT ASSURANCE REPORT

*To the management of Entrust Corporation ("Entrust"):*

### Scope

We have been engaged, in a reasonable assurance engagement, to report on Entrust management's [statement](#) that for its Document Signing as a Service ("DSaaS") Certification Authority ("CA") operations in Ottawa, Ontario, Canada, Toronto, Ontario, Canada, Denver, Colorado, USA, Dallas, Texas, USA, and Berkshire, United Kingdom, throughout the period 1 March 2022 to 28 February 2023 (the "Period") for its CAs as enumerated in [Attachment A](#), Entrust has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its Certification Practice Statements as enumerated in [Attachment B](#)
- maintained effective controls to provide reasonable assurance that Entrust provides its services in accordance with its Certification Practice Statements
- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by Entrust); and
  - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorised individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#).

Assessment of controls at DSaaS operations in US and UK was limited to the following WebTrust for CA criteria:

### CA Environmental Controls

- Security Management
- Asset Classification and Management
- Personnel Security
- Physical and Environmental Security
- Operations Management
- System Access Management
- Disaster Recovery, Backups, and Business Continuity Management
- Monitoring and Compliance
- Audit Logging

### CA Key Lifecycle Management Controls

- CA Cryptographic Hardware Lifecycle Management

Assessment of controls related to DSaaS operations in Canada was limited to the following WebTrust for CA criteria:

#### **CA Environmental Controls**

- System Development, Maintenance, and Change Management

#### **Subscriber Key Lifecycle Management Controls**

- CA-Provided Subscriber Key Generation Services
- CA-Provided Subscriber Key Storage and Recovery Services
- Requirements for Subscriber Key Management

Entrust DSaaS operations do not provide CA key generation, storage, archive, or management services, integrated circuit card management services, suspension services and do not provide third-party subordinate CA or cross certificate issuance or management services. Accordingly, our procedures did not extend to controls that would address those criteria.

#### **Certification authority's responsibilities**

Entrust's management is responsible for its statement, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

#### **Our independence and quality control**

We have complied with the relevant rules of professional conduct / code of ethics applicable to the practice of public accounting and related to assurance engagements, issued by various professional accounting bodies, which are founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies Canadian Standard on Quality Control 1, *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance Engagements*, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

#### **Practitioner's responsibilities**

Our responsibility is to express an opinion on management's statement based on our procedures. We conducted our procedures in accordance with Canadian Standard on Assurance Engagements 3000, *Attestation Engagements Other than Audits or Reviews of Historical Financial Information*, set out in the CPA Canada Handbook – Assurance. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management's statement is fairly stated, and, accordingly, included:

- (1) obtaining an understanding of Entrust's key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
- (2) selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
- (3) testing and evaluating the operating effectiveness of the controls; and
- (4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Relative effectiveness of controls**

The relative effectiveness and significance of specific controls at Entrust and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

### Inherent limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorised access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

### Other matters

Without modifying our opinion, we noted the following other matters during our procedures:

Matter topic	Matter description
<b>1 No instances or occurrences of the control activity during the audit period</b>	During the examination period there were no instances or occurrences of the following control activity: <ul style="list-style-type: none"><li data-bbox="576 651 1390 790">• <b>WTCA 4.8 Cryptographic Device Life Cycle Management</b> No cryptographic device life cycle events occurred for US and UK operation during the audit period. As underlying event had not occurred, related control activities did not operate during period under audit and their operating effectiveness was not tested.</li></ul>

### Practitioner's opinion

In our opinion, throughout the period 1 March 2022 to 28 February 2023, Entrust management's statement, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

This report does not include any representation as to the quality of Entrust's services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.2.2, nor the suitability of any of Entrust's services for any customer's intended purpose.

## ENTRUST MANAGEMENT'S STATEMENT

Entrust Corporation ("Entrust") operates the Document Signing as a Service Certification Authority ("DSaaS CA") services as enumerated in [Attachment A](#), and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate validation
- Subscriber key generation and management

The management of Entrust is responsible for establishing and maintaining effective controls over its DSaaS CA operations, including its CA business practices disclosure on its [website](#), CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to Entrust's Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Entrust management has assessed its disclosures of its certificate practices and controls over its DSaaS CA services. Based on that assessment, in Entrust management's opinion, in providing its DSaaS CA services at Ottawa, Ontario, Canada, Toronto, Ontario, Canada, Denver, Colorado, USA, Dallas, Texas, USA, and Berkshire, United Kingdom, throughout the period 1 March 2022 to 28 February 2023, Entrust has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environment control practices in its Certification Practice Statements as enumerated in [Attachment B](#)
- maintained effective controls to provide reasonable assurance that Entrust provides its services in accordance with its Certification Practice Statements
- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by Entrust); and
  - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#), including the following:

### DSaaS CA operations in US and UK

#### CA Environmental Controls

- Security Management
- Asset Classification and Management
- Personnel Security
- Physical and Environmental Security
- Operations Management

- System Access Management
- Disaster Recovery, Backups, and Business Continuity Management
- Monitoring and Compliance
- Audit Logging

#### **CA Key Lifecycle Management Controls**

- CA Cryptographic Hardware Lifecycle Management

#### **DSaaS CA operations in Canada**

Assessment of controls related to DSaaS operations in Canada was limited to the following WebTrust for CA criteria:

#### **CA Environmental Controls**

- System Development, Maintenance, and Change Management

#### **Subscriber Key Lifecycle Management Controls**

- CA-Provided Subscriber Key Generation Services
- CA-Provided Subscriber Key Storage and Recovery Services
- Requirements for Subscriber Key Management

Entrust DSaaS operations do not provide CA key generation, storage, archive, or management services, integrated circuit card management services, suspension services and do not provide third-party subordinate CA or cross certificate issuance or management services. Accordingly, our statement does not extend to controls that would address those criteria.

No cryptographic device life cycle events occurred for US and UK operations during the audit period. Accordingly, our statement does not extend to controls that would address those criteria.

A handwritten signature in black ink that reads 'Bruce Morton'.

Bruce Morton  
Director, Entrust Certificate Services  
18<sup>th</sup> May 2023
