SOLUTION ADVANTAGES

- High Assurance certificate-based credentials for Intune deployments
- Leverage your enterprise Certificate Authority for managing Intune devices
- Integrates with managed or on-premises PKI from Entrust Datacard
- Full customizable certificate policy and definition allow for robust and extended use cases
- Rapid deployment
- Secure communications/Secure tunnel/VPN
- Crypto policy and algorithm management (data protection, encryption)
  - Different profiles for different devices — ECC vs RSA (key lengths)
  - Rotation policies

KEY CAPABILITIES

- Ensures secure delivery of keys and certificates to devices
- Leverages industry-standard SCEP protocol for maximum device interoperability
- Full credential lifecycle management through Entrust Authority
- Certificate publishing and validation services allow for real-time revocation checking

ENTRUST DATACARD® PKI INTEGRATION WITH MICROSOFT INTUNE

Entrust Datacard has the PKI expertise to help organizations get to where they want to go. With our comprehensive policy implementation and uniquely flexible and easily scalable PKI, you can establish and manage all of your use cases simultaneously — drastically increasing the speed of new application deployment without introducing risk. With Microsoft Intune, organizations can easily manage all of their mobile devices and applications, seamlessly enabling enterprise mobility.

The combination of Entrust Datacard PKI and Microsoft Intune allows customers to leverage the enterprise high assurance PKI environments seamlessly with their enterprise IT management platform. Flexible and Extensible PKIs allow devices of any kind to be enrolled securely with extended key and certificate parameters to support advanced identification, authentication and authorization schemes.

See infographic on reverse side.
The secure enrollment ensures no tampering occurs at any point in the certificate issuance. Organizations can issue certificates via Entrust Datacard to provide seamless authentication to applications and on-premises resources, creating a user-friendly, flexible and cost-effective experience. All in addition to certificate-based authentication.

Entrust Datacard Corporation

Consumers, citizens and employees increasingly expect anywhere-anytime experiences — whether they are making purchases, crossing borders, accessing e-gov services or logging onto corporate networks. Entrust Datacard offers the trusted identity and secure transaction technologies that make those experiences reliable and secure. Solutions range from the physical world of financial cards, passports and ID cards to the digital realm of authentication, certificates and secure communications. With more than 2,000 Entrust Datacard colleagues around the world, and a network of strong global partners, the company serves customers in 150 countries worldwide.
