Warning: This product contains chemicals, including lead, known to the State of California to cause cancer, and birth defects or other reproductive harm. Wash hands after handling.

For more information on this warning, refer to: www.datacard.com/califpropwarning.

The printer must be used as installed and recommended by Datacard. You may not modify the printer or how it is used without written permission. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
Step 1: Prepare the Printer

If you are setting up an SD460 system, also refer to the setup instructions shipped in the laminator carton.
Step 2: Plug In and Power On the Printer

1. Connect the printer to a power source.
2. Power on the printer.

Step 3: Set Up the PC

1. Insert the Datacard XP9 Card Printer Driver disk.
2. Install the printer:
   - Network
   - USB

⚠️ Do not plug in the USB cable until prompted.
Step 3: Set Up the PC—cont.

Step 4 (USB): Install a USB Printer—cont.

Go to “Step 5: Print a Sample Card” on page 12.
Step 4 (Network): Install a Network Printer—cont.

Network

4c
